PROFILE

I am dedicated, innovative and self-motivated front-end web developer with previous experience in back-end development and software QA. Multilingual (English, Ukrainian, Russian)

EXPERIENCE

JUNIOR FRONT END DEVELOPER
FOLICA | APR 2016 - PRESENT

- Managed the development of the new front-end for the web application including removal of the existing, separate, mobile templates. Implemented a fully responsive UI
- Coded marketing promotional emails to display properly on all platforms to increase email open and click through rates
- Coordinated with Senior Designer on all design work for the front-end and made sure they were executed to the set requirements
- Worked hand-in-hand with the VP of Technology regarding project architecture, requirements and scheduling
- Refactored all site CSS and JS, as well as performed due diligence by researching plugin options to replace outdated ones
- Collaborated with Back-End Developer to implement a new section for faceted navigation on the site
- Responsible for cross browser testing of new responsive site
- Managed time using Jira ticketing system for time estimation and detailing regression testing requirements
- Researched, integrated and tested meta data following schema.org guidelines to promote rich search results and improve SEO ranking

FRONT END WEB DEVELOPER, INTERN
ONEWIRE | JAN 2016 - APR 2016

- Developed Front End of the company's main and partners' sites. Coded HTML emails. Provided website maintenance and enhancements. Assisted back-end developers with coding and troubleshooting

BACK END WEB DEVELOPER
NYC DEVSHOP | JUL 2015 - NOV 2015

- Developed MVP of a large scale application. Integrated user-facing elements developed by front-end developers with server logic. Tested application and fixed bugs. Integrated multiple social media / financial / accounting APIs
